

# Integrate and Synchronize your CAD data with EPICOR CMS

## Overview

CADLink allows engineers to create Epicor CMS Global and Part Plant Item Master records, as well as Production Methods identical to engineering CAD data with the click of a button. The direct integration reduces manual data entry and clerical errors. Production benefits from drawing information identical to work order documentation.

Increase the speed of data flow from sales to engineering, procurement, and manufacturing. Streamlining the entire product development process by integrating your CAD system and your Epicor CMS solution gives you the edge in the competitive market. This eliminates all the burdens you face from having disparate systems, allowing engineers to focus on the designs and innovation.

Keeping your Epicor CMS engineering data accurate and synchronized with your engineering drawings and models is critical. With CADLink, you will see significant improvements in production speed, on-time shipments, and accuracy of Epicor CMS engineering data with reductions in engineering cost, scrapped parts, and shop floor confusions.

### Direct CAD Integration

Real-time, direct, two-way link between your CAD and your Epicor CMS means no more exporting or importing of data files. Launch directly from the CAD suite of your choice. Interface for indented multi-level production methods and thumbnail preview image of the CAD part lets you know what you are looking at.

Platinum ISV Partner

### Direct Integration to Epicor CMS

Assign essential Epicor CMS fields such as GL Sales Code, Expense Code, and Operations using ERP drop-down menus in CADLink.

### Bi-directional Data Push

Bi-directional data push keeps your CAD and Epicor CMS engineering data synchronized and up-to-date. Critical information such as part quantity and material selection will be kept consistent throughout your CAD and Epicor CMS systems.

### Live Data Comparison

Live comparison lets you visually review Production Method changes before committing to save. Create ERP Item and Production Method records identical to your drawings in one click.

## Partners & Integrations

Work with CAD/PLM/PDM of your choice

## Discrepancy and Error Notification

Resolve discrepancies in the CADLink interface and automatically update both your CAD files and Epicor CMS data. CADLink checks for critical errors and notifies the user before saving.

## Powerful Searches

Search your Epicor CMS Global and Part Plant Item Master live and insert raw material items to your Epicor Production Method to create a complete record; not just what you modeled.

## Eliminates Duplicate Manual Data Entries

Single-step process eliminates duplicate manual data entries of engineering data.

## Quick and Easy Routing Interface

CADLink offers a simple interface for creating and assigning ERP operations on your Production Method.

## Powerful Visual Interface

CADLink offers an intuitive and highly visual interface to display data discrepancies. Production Method quantity changes and updates are displayed in change summary tab.

## One-Click Summary Report

Easily generate PDFs of important data. Change summary report and export Production Methods in an Excel to meet your documentation requirements.

## Color Coded Changes

Engineers can easily see the effects of changes to ERP and CAD data.

Green fields represent new parts that will be created in Epicor CMS.

Yellow fields highlight data discrepancy between CAD and Epicor CMS such as description or quantity.

Gray fields represent parts to be removed from your Production Method in Epicor CMS.

## Small Footprint

CADLink offers an easy installation and setup, and small footprint with minimum client machine hardware and software requirements. CADLink installation requires no additional database or server components.

## About QBuild

Since 2002, we have provided superior service to our customers across the globe. Our many years of experience and commitment to excellence have earned us the reputation as the best CAD ERP integrator in North America.

## QBuild Service

At QBuild we believe in finding the right solution for our customers. We take the time to understand your unique needs and requirements. We put you in the driver's seat with direct access to our most experienced developers. This allows us to offer flexible, targeted customization solutions for your specific needs.
