

A Better Way To Process Engineering Design Changes

Product Overview

Streamline your engineering change processes with ECx Manager, the cutting-edge solution that seamlessly integrates design changes into CAD and ERP systems. Use ECx Manager from your browser to manage Engineering Change Requests (ECRs), Engineering Change Orders (ECOs), and Engineering Change Notices (ECNs) providing a comprehensive platform to enhance efficiency and control throughout the engineering change process.

Benefits

Effortless Integration

ECx Manager bridges the gap between engineering design changes and CAD/ERP systems, ensuring a smooth and cohesive workflow. Say goodbye to manual data entry and hello to automated precision.

Visibility and Transparency

Gain real-time visibility into the impact of engineering design changes on Purchase Orders (POs), inventory, and ongoing ERP jobs. ECx Manager empowers you with insights to make informed decisions swiftly.

Affordable

Ready to take your engineering change management to the next level, but not ready to implement a full PLM System? ECx Manager offers an affordable out of the box solution to help you take control of your engineering change process.

User-Friendly Interface

Designed with user experience in mind, ECx Manager offers an intuitive interface that simplifies the complex task of engineering change management. Navigate effortlessly through the system, making the integration process a breeze.

Change Management Mastery

Tackle ECRs, ECOs, and ECNs with ease. ECx Manager centralizes change management, allowing your team to collaborate seamlessly and implement modifications swiftly, minimizing downtime and maximizing productivity.

Features

No User License Limits

Experience the freedom to expand your team's capabilities without the constraints of user licensing. ECx Manager is your gateway to unlimited collaboration, ensuring that every team member plays a crucial role in shaping and implementing engineering design changes.

ECR, ECO and ECN Management

Manage all facets of the engineering change management process with the ability to control the ECR, ECO and ECN processes in a central web-based application.

Flexible Approval Path

ECx Manager lets you fully customize the approval path for each specific ECR, ECO and ECN. An intuitive drag and drop feature lets you choose exactly which user or group has an approval action assigned. If this is a common workflow, save it as a template for future use!

Historical Data at your Fingertips

Don't underestimate the importance of historical data. With ECx Manager, you can always return to previously approved, canceled, or rejected ECRs, ECOs or ECNs. Review past decisions and communications to enhance future decision making processes. A user can easily sift through any changes ever made as well as their respective impact on the ERP.

In-App Comments & Communication

Transparency is key to successful change management. The comments section in ECx Manager ensures that all stakeholders have visibility into discussions, fostering a transparent and inclusive environment where everyone's input is valued.

Partners & Integration

Since 2002, we have provided superior service to our customers across the globe. Our many years of experience and commitment to excellence have earned us the reputation as the best CAD ERP integrator in North America.
